AHMET KEMAL DAŞHAN CV

summary

Hello!

I'm Kemal, a full-time industrial designer and part-time daydreamer based in Istanbul, Türkiye.

I'm a concept-driven industrial designer with experience across diverse industries, including lighting, defense, consumer electronics, transportation design, and visual communication. I enjoy exploring ideas through sketching, developing them in 3D, and carrying concepts toward production while building a clear identity around each product. I'm constantly exploring new tools and technologies that expand the way I design and think.

education

Bachelor's Degree - Industrial Design

Anadolu University/Eskişehir Technical University (2019-2014)
GPA: 3.35

School of Foreign Languages

Anadolu University (2018-2019)

skills

3D Modelling

Blender
Rhinoceros
Autodesk Fusion360

Visualization

Keyshot
Adobe Photoshop
Adobe Illustrator

Basics

Problem Solving
Drawing
Researching

Sketching

Procreate
Autodesk Sketchbook

Language

English (B2 - Upper Intermediate)
Turkish (Native)

experiences

Industrial Designer

CES Advanced Composites (06.2024 - Ongoing)

Worked as an Industrial Designer across defense, agriculture, and emergency services projects, from personal protective equipment to transportation design. Contributed throughout the entire process, from briefing and concept development to production, with a focus on products designed for composite manufacturing.

Jr. Industrial Designer

ONOFF Lighting Design Studio (03.2024 - 06.2024)

Worked as an Industrial Designer in the lighting industry, designing acoustic lighting solutions for office environments. Actively involved from concept development through visualization, while also contributing to detail development for ambient lighting products in architectural lighting projects.

Promoter and Industrial Designer

A' Design Award & Competition (10.2023 - 03.2024)

Responsible for connecting with designers and identifying award-worthy projects. Attended design fairs to build a professional network and supported prospective participants through direct communication. This experience broadened my perspective on design and strengthened my professional vision.

Freelance Industrial Designer

(09.2023 - Ongoing)

Designed bathroom and home decor products for Helixomme, a newly established brand. Also worked on freelance projects for individual clients, including brand identity development, logo design, and illustration.

Graduation Project

Vestel Electronic (01.2023 - 06.2023)

Designed a digital companion that integrates with smartphones via MagSafe, aiming to reduce screen time and encourage more mindful digital habits. The project explores a growing challenge of both today and the future, helping users build greater awareness of their screen use.

Internship - Office

Hexagon Studio (07.2022 - 08.2022)

Developed a gaming laptop concept for Monster, exploring new approaches to style and user experience. During the internship, I also gained insight into major transportation design projects and completed design thinking training.

awards

A' Design Award

Crest Modular Fire Fighter Helmet
